Temple University, Bachelor of Arts in Music Education, 2015

Google UX Design Certification, 2022

EXPERIENCE

Chingu- Frontend Developer/UX

- Worked remotely with a team to develop a resource management app
- Used React, JavaScript, TypeScript, and React Router to create a multi-page application
- Created supply allocation, supply transfer, and resource monitoring, based on current time with a developer mode to advance time.
- Utilized agile methodologies, pair programming, and code reviews, to maintain an efficient project workflow using Git and pushed clean code to development on a weekly basis
- Managed UX with Hi-Fidelity mockups in Figma that translated to responsive design

Web Developer - Freelance

- Communicated with clients throughout the design and development process to fulfill needs in both form and function
- Conducted in-depth user research and competitive audits to iterate on design solutions
- Maintained an efficient project workflow using Git version control

Cherokee High School - Teacher / Program Coordinator

- Developed curriculum with scalable teaching model to increase department enrollment by 100%
- Coordinated sponsorships, managed branding/marketing, and product design
- Led a diverse staff and student body to National recognition for musical opportunities and achievements by our department
